V. EXECUTIVE DIRECTOR REPORTS

FINANCE – Joe Tomashosky advised the Board that they had a very good month for East Orange collections. The collection rate for the month was 118.1%. He also advised that they have collected about \$2 million more than anticipated. The 52+ days outstanding account at the end of December is 55.3% of total receivables compared to pre-pandemic. The big challenge is to get that collected as we move forward. Budgeted expenses were met in 2021. The largest positive variance was Salary and Wage expenses as needed staff was not hired due to COVID. All in all, another good year in terms of meeting and exceeding budget.

CUSTOMER SERVICE - Sheri Lassiter advised that the only new complaint is a customer asking for a 24-month payment arrangement. A brief discussion was then held regarding same.

CAPITAL – Tom Matich advised the Board that the distribution project has been ongoing since 2020. It is now at the construction phase end. As of Friday, there are less than 6 services to install. Final pavement of the restoration will begin in the Spring. The Emergency Generator Project which commenced last year is on the final phase as well. He then advised the Board that they halted some onsite vendor work due to COVID and are now slowly beginning to allow them back. That includes the SCADA project as well. The Disinfection Conversion Project is ready for advertising. The bid opening date will be in February.

MAINS – Tom Matich advised the Board that Lead Service Line inventory is due on Friday. Information from both the customer database and distribution system are being entered into the approved spreadsheet format.

WORPS – Tom Matich advised the board that last month yielded one of their largest regular water sale months. Last month they provided just about 33MG or \$110,000 in sales.

DIRECTOR REPORT – Director Liu spoke about ongoing projects such as Woodland Avenue. The project reports will be submitted this month by the Engineers. He then advised that the Computerized Maintenance Management System (CMMS) program is ongoing. They continue to replace large meters as they see fit. Dickenson #3 is being designed. New Hires have been sent to personnel so they can get the advertisements out.

Director Liu then advised the Board that he would like to discuss three (3) items:

- 1) **Lead Line Service Inventory** must be submitted to the State. Thirty (30) days after they have to notify the customers that they have a lead line service. He then went over same with the Board.
- 2) **Ionized Study** - Sanitary Sewer Line and Storm Water that goes directly to Passaic Valley. Passaic Valley has meters that charge for every drop that goes through the meter. Therefore, they need to do a study to see how much stormwater is getting into the system. They were notified by Passaic Valley that they have a major inflow situation. Rainfall is getting into the sanitary sewer system which is making it 80 times higher than the normal inflow. He then went on to briefly discuss same with the Board.
- 3) **PFOA** is a new regulation. All the PFOA's are coming from the Canoe Brook Well Field. All these wells have PFOA and the VOC problem. They are looking to solve the mystery about where the PFOA is coming in. It will cost about \$10 Million of capital investment. If they can find out where it is coming in, they can switch the wells and maybe eliminate the problem. A discussion was then held regarding same.
